
Preschool, level 1a

2-3 players and a dice. Roll the dice. The player with the highest number, solves the next square. Roll dice again to decide who solves square number 2 etc. Every square is only solved once.

<u>More ideas:</u>
Show the number with your fingers. How does the number look? What is the thing "in the square" used for? To what can the letter be used? Which sound or letter does the word begin with?

All players do all exercises.
